Overview of the Workshop

Industry Terminology

The instructor familiarizes attendees with the language of equipment leasing and finance. Throughout the workshop, additional terms and their use will be explained.

Rules and Regulations

This section is a basic overview of the current Federal Income Tax code, the current bank regulations and requirements, and the definition of a lease for legal contracts. Attendees will gain an understanding of why the rules developed, and learn the paper flow and procedures required to complete a lease.

Types of Lease and Finance Transactions

This section highlights loans and leases and their purposes, their structures, pricing, end-of-term options, and how each type does or does not comply with different legal, tax and accounting rules. Attendees will learn how pricing reflects the structure and how it can be modified to fit a specific need of the lessee/borrower and the lessor/lender.

NOTE: Attendees MUST bring a Hewlett-Packard 12c or 17b II+ financial calculator.

Lease Accounting

Attendees will learn how current accounting requirements affect the structure of a lease, and the difference between accounting and income/expense for commercial income tax returns. Instructors will discuss the upcoming changes to lease accounting rules, the impact upon balance sheet and operations of Lessors and Lessees and equipment procurement strategies.

Benefits of Leasing

Why is leasing attractive to many companies? What are its tax, legal, and accounting benefits? How does it differ from lending, and how does each method of financing handle different needs and requirements of the customer?

Types of Lease Programs

Attendees will examine sample lease structures to learn how specific arrangements for vendors or equipment types can help determine the parameters of a transaction. Unique programs that fit a specific need of the lessee (e.g., seasonality of revenue stream or expense control), will also be presented.

Types of Equipment Lease and Finance Institutions

Attendees will learn the variations and requirements of different types of leasing and finance institutions.

General Legal Overview Structure, Terminology, Laws and Documentation

The different types of legal entities—from proprietorships to corporations—will be reviewed, along with the required legal forms needed to complete a lease or equipment financing for each. Using a sample lease transaction, participants will review the required documents, including the purpose of each. The internal forms for managing the workflow will also be discussed. By examining the contents of the lease agreement, attendees understand the necessity for particular documents from both the lessor's and lessee's perspectives.

Fraud Prevention and Detection

Attendees will learn to recognize the many faces of fraud and discuss suggestions for preventing fraudulent transactions.

Lifecycle of a Lease

The transaction paper flow from the marketing, sales, structuring and pricing phase into credit evaluation, documentation procedures, booking, billing, collection, termination and asset management phases is reviewed.

Quiz

Attendees complete the workshop with a 60-question quiz that reviews all the principles presented.

Please note: In order to receive a certificate of completion for this workshop, attendees are required to complete the Quiz.
