9:30 – 10:45 am GENERAL SESSION – What’s Hot, What’s Not in Equipment Leasing & Finance for 2024

Location: Grand Ballroom AB, 5th Floor

2024 is shaping up to be a challenging year, as the economy is expected to decline. Some are predicting a recession. Businesses in the U.S. are dealing with high inflation, and interest rates that will stress many equipment sectors. Bankruptcies are rising. ‘Black Swans’ related to geopolitical actions could also challenge global economies, which could negatively impact the outlook. In addition, supply chain problems persist but to a lessening degree. The annual rate of equipment and software spending is forecast to decline, but what are the drivers, and in which areas? Receive answers to such questions as, “How will the economy change in 2024, how long will ‘high’ inflation continue, and how does the U.S. economy compare to those of the rest of the developed world? Also, what are the most desirable equipment types to lease or finance? What are the effects of increasing oil prices and interest rates on certain industries? Where is the risk? What types of equipment are viewed negatively and why? Are there disturbing secondary market bubbles?” These are but some of the topics to be addressed in this presentation that will also highlight the results of a survey of more than 400 equipment managers and industry experts. In addition, insights and outlooks for various equipment markets will be discussed with an emphasis on: current conditions; changes over time; technology; regulations; valuation issues; and various current and future residual challenges and opportunities. Q & A time throughout the presentation will be provided. This session will also summarize the opinions of survey participants relating to the economy and secondary market concerns.
